For Women with Early-Stage Breast Cancer

Order the National Cancer Institute's new decision aid to complement your dialogue with women facing breast surgery.

This tool outlines the pros and cons of different surgical options for women. When used during consultation with their physicians, it can help patients decide which type of surgery is best for them.

Topics discussed include:

- Breast-sparing surgery
- Mastectomy
- Mastectomy with breast reconstruction surgery
- Common questions and answers that women can discuss with their doctors
- Medical dictionary

You can order up to 20 copies FREE
